Hi Folks,

For the first time ever we're setting a deadline for ourselves 😊
We're aiming for June 5th for the release of the new v2.4.0 update!
The core of the plugin has basically been rewritten since the original announcement of the new update, and it will be well worth the wait 😊

Some of the highlights what the next version will give you are:

- Custom Rosen impulses (<http://www.rosen.digital>)
- Fat Lazy Cabs impulses
- Kalthallen impulses (add-ons)
- Updated IR loader (now called "FIRE")
- Stereo multicore processing support (share the plugin load over multiple cpu's when running in stereo mode).
- Resizable GUI (option to scale the entire GUI down to 60% of the original size).
- TSE X30 v2.0 (Every channels and modes)
- Updated AquaLaser rack module
- Option to set Tuner reference frequency
- Ability to pair the X50 PA with the new X30 model
- Module based Preset Manager (can save/load partial presets)
- Overall stability improvements

This is a huge (free) update for existing customers and a great opportunity for new customers to get a hint of the future of this software. June will be an exciting month for X50 followers for sure 😊

Best Regards
John A. Johansen
